

PROCESS FOR MANUFACTURING A CELLULOSIC  
PAPER PRODUCT EXHIBITING REDUCED MALODOR

ABSTRACT OF THE INVENTION

5 A process for manufacturing a cellulosic paper product  
is provided. The process comprises forming an aqueous  
suspension of papermaking fibers; introducing sodium  
bicarbonate into the aqueous suspension; depositing the  
aqueous suspension onto a sheet-forming fabric to form a wet  
web; and dewatering and drying the wet web. The process of  
10 the present invention provides cellulosic paper products  
exhibiting a reduced malodor upon re-wetting.
